## Code of Professional Ethics

The member will make every effort to preserve and protect our natural resources and environment and to understand how economic and social forces interact with these resources. In reconciling the public's needs with environmental protection and enrichment, the member has a social and economic responsibility to ensure that the natural ecological system is protected as far as possible. The member will strive to advance the welfare of the profession by providing the highest possible level of professional services. In all professional matters, the member will make the best use of all his or her knowledge, expertise and creative ability. The member will at all times, faithfully carry out duties which he or she undertakes and have due regard to the interest of his or her clients, and shall act with loyalty towards his or her professional colleagues. He or she shall act with integrity and understanding and must not act in any morally reprehensible manner. A member shall avoid any action or situation which is inconsistent with his or her professional obligations or is likely to raise doubts as to his or her integrity as a landscape architect. The member shall rely only on ability and achievement as the basis for his or her advancement in practice. The member will encourage educational research into the fields of planning, design and construction of the physical environment. He or she will make every effort to ensure that important discoveries and useful technical information relating to the above fields are disseminated and shared among fellow members.

## Instruction

**An application is considered complete only when this membership is duly completed.** The applicant has included the **full fee** (a one time registration fee and administration fee; and the first year subscription fee) and **copies of professional qualification certificates are attached.**
